Note: Lab Solution is present in `Desktop\power-bi-quickstart\Labfiles\Lab05\Solution` folder:

Lab: Modeling Data

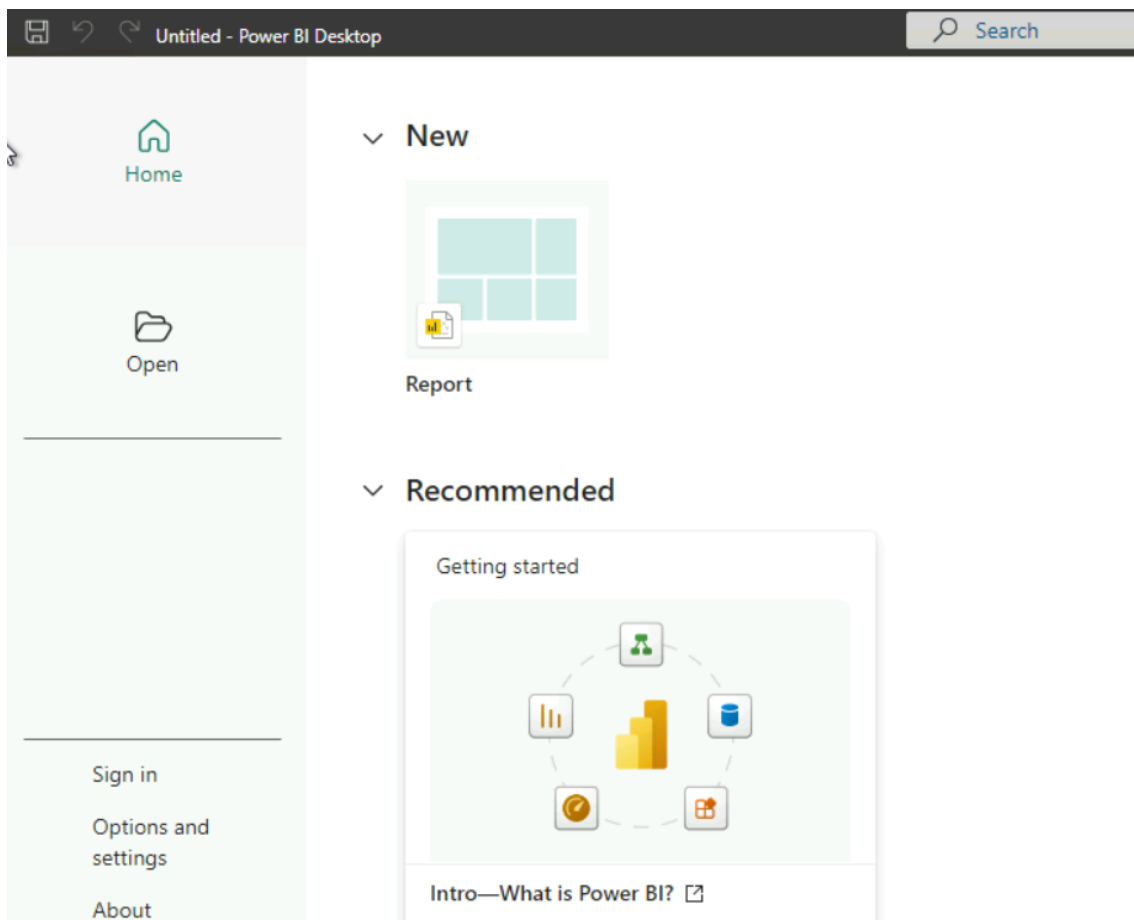

Exercise 1: Create Relationships

Task 1: Preparing the Environment

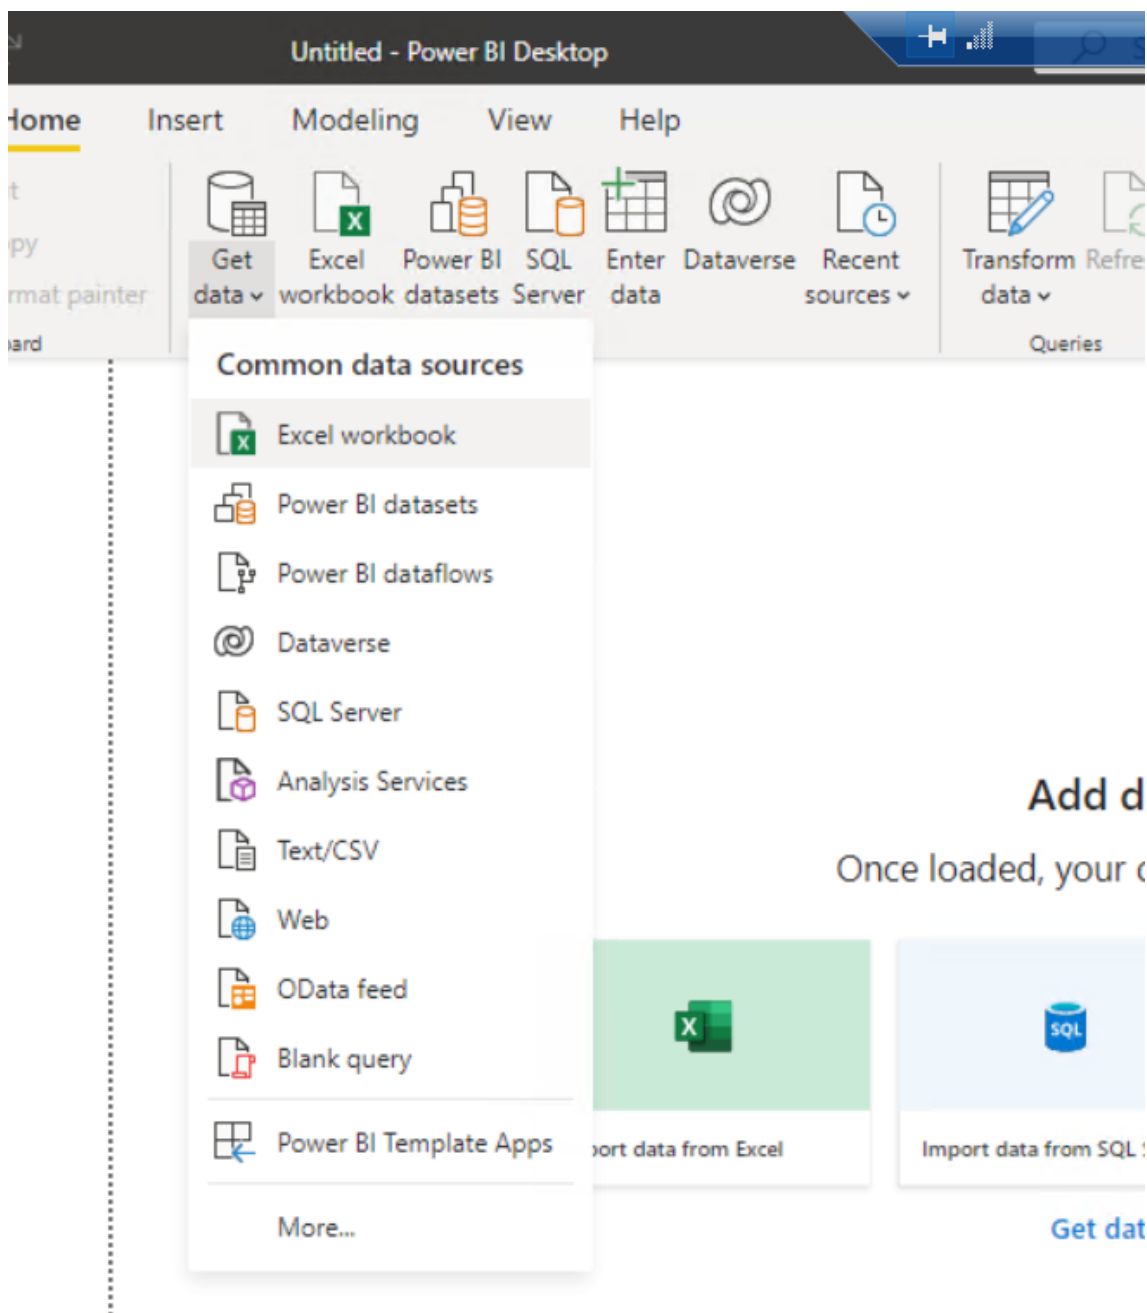

Lab environment is already setup.

Task 2: Automatic Relationships

1. Make sure previous tasks was completed.
2. On the Taskbar, click **Power BI Desktop**.
3. Click **New > Report**:

5. In the **Power BI Desktop** window, click **Get data**.
6. In the **Get Data** dialog box, ensure **Excel Workbook** is selected.

7. In the **Open** dialog box, navigate to **Desktop\power-bi-quickstart\Labfiles\Lab05\Starter\Project**, click **Adventure Works Sales Data.xlsx**, and then click **Open**.
8. In the **Navigator** dialog box, select the **DimCurrency**, **DimCustomer**, **DimDate**, **DimProduct**, **DimPromotion**, **DimSalesTerritory**, and **FactInternetSales** check boxes, and then click **Load**.

- In the Model pane, look at the relationship that Power BI has created between the two tables.
- Right-click the relationship line between **DimProductCategory**, and **DimProductSubcategory**, and then click **Delete**.

6. In the **Delete Relationship** dialog box, click **Delete**.

- In the **DimProductSubcategory** table, drag the **CategoryKey** column to the **CategoryKey** column in the **DimProductCategory** table.
- Double-click the relationship line between **DimProductCategory**, and **DimProductSubcategory**.
- In the **Edit relationship** dialog box, ensure the **Cardinality** is set to a **Many to one (*:1)** relationship.
- In the **Cross filter direction** list, click **Both**, and then click **OK**.
- In the **DimProduct** table, drag the **ProductSubcategoryKey** column to the **SubcategoryKey** column in the **DimProductSubcategory** table, to create a **Many to one (*:1)** relationship.
- Right-click the relationship line between **DimProductSubcategory**, and **DimProduct**, and then click **Properties**.
- In the **Edit relationship** dialog box, in the **Cross filter direction** list, click **Both**, and then click **OK**.
- On the **File** menu, click **Save**.
- Leave Power BI Desktop open for the next exercise.

Exercise 2: Calculations

Task 1: Adding Calculated Columns

- In Power BI Desktop, in the views pane on the left-hand side, click **Data**.
- In the **Data** pane, right-click **DimCustomer**, and then click **New column**.

- In the formula bar, highlight **Column =**, type the following script, and then press Enter:

```
IncomeStatus = IF (DimCustomer[YearlyIncome] < 25000, "Lower Income",
IF (AND(DimCustomer[YearlyIncome] >= 25000, DimCustomer[YearlyIncome] < 60000),
"Middle Income",
IF (AND(DimCustomer[YearlyIncome] >= 60000, DimCustomer[YearlyIncome] <
100000), "Higher Income",
```

```
IF (DimCustomer[YearlyIncome] >= 100000, "Very High Income", "Other"))))
```

The screenshot shows the Power BI Desktop interface. The formula bar at the top contains the following DAX formula for the 'IncomeStatus' column:

```
IncomeStatus = IF (DimCustomer[YearlyIncome] < 25000, "Lower Income",
IF (AND(DimCustomer[YearlyIncome] >= 25000, DimCustomer[YearlyIncome] < 60000), "Middle Income",
IF (AND(DimCustomer[YearlyIncome] >= 60000, DimCustomer[YearlyIncome] < 100000), "Higher Income",
IF (DimCustomer[YearlyIncome] >= 100000, "Very High Income", "Other"))))
```

The data table below shows the results of this formula. The 'IncomeStatus' column is highlighted in yellow.

12. In the **Data** pane, right-click **DimProductSubcategory**, and then click **New column**.

13. In the formula bar, highlight **Column =**, type the following script, and then press Enter:

```
MainCategory = RELATED(DimProductCategory[CategoryName])
```

14. In the **Data** pane, right-click **DimPromotion**, and then click **New column**.

15. In the formula bar, highlight **Column =**, type the following script, and then press Enter:

```
PromotionLengthDays = DATEDIFF(DimPromotion[StartDate], DimPromotion[EndDate], DAY)
```

16. In the **Data** pane, right-click **FactInternetSales**, and then click **New column**.

17. In the formula bar, highlight **Column =**, type the following script, and then press Enter:

```
Profit = CURRENCY(FactInternetSales[UnitPrice] - FactInternetSales[ProductStandardCost])
```

18. Close Power BI Desktop, saving any changes.
